

# go-swagger for describing and implementing APIs

Andreas Grimmer  
@grimmer\_andreas  
grimmer.andreas@gmail.com

# Agenda

- What is go-swagger?
- Installation
- Implementation of a TODO-List

# What is go-swagger?

- Implementation of Swagger 2.0 (aka OpenAPI 2.0)
- Swagger is a simple yet powerful representation of your RESTful API

## **Features**

- Generates a server or client form a swagger spec
- Generates a swagger spec from annotated go code

## **Status**

- Feature-complete and stable API

# Installation

```
go get -u github.com/go-swagger/go-swagger  
go install ./cmd/swagger
```

Further install possibilities: <https://goswagger.io/install.html>

# Implementation of a TODO-List

- Complete source code: <https://github.com/agrimmer/todo-list>
